Application Versatility and Consistent Championship Performance – That’s What You Can Expect From Binks Trophy Series Equipment.

Whatever size job or part you’re finishing – whatever material you’re spraying – Binks Trophy Series spray guns provide the technology and confidence needed for most jobs and coatings.

BINKS HAS YOU COVERED.

Pressure Feed Full Size, Pressure Feed Touch Up

Gravity Feed Full Size, Gravity Feed Touch Up

Siphon Feed Full Size

Binks Trophy Series spray guns combine cutting edge atomization technologies with lightweight, easy-handling ergonomic design.

THE RESULT? Spray guns you can count on – day in and day out – for use with virtually all coating applications over a very long time.

FINISHING AT THE FRONT: TROPHY SERIES AIR CAPS ATTAIN INDUSTRY LEADERSHIP

Binks engineering has developed a broad selection of air caps to ensure our ability to provide customers with the right gun with the perfect air cap for the job. The new air cap designs provide uniform spray patterns with consistent atomization from top to bottom.

Our air cap selection accommodates:

HVLP – Air pressure is less than 10 PSI at the air cap meeting all USA standards and regulatory requirements.

LVMP – Provides equal to or greater transfer efficiency at higher air pressures than HVLP

CONVENTIONAL – For spray applications requiring higher air pressure. Also suitable for viscous material set-ups.

AIR CAPS AT A GLANCE:

	HVLP	LVMP	CONVENTIONAL
Transfer Efficiency	Meets Regulatory Standards	Equal to or better than HVLP	Less than HVLP and LVMP
Fluid Flow	Good	Better	Best
Air Flow	High	Low	Low
			

Fluid Nozzles and Needles

Binks Trophy Series Spray Guns can be outfitted with a variety of fluid tips designed and manufactured to handle a broad range of application materials. These include:

TUFF TIP

Our stainless steel fluid nozzles are hardened and last 20% longer.*

The stainless steel fluid nozzles are used for general purpose, a wide variety of coatings

Size range: .5 to 2.6 (mm)

Plastic

Plastic needles are typically used for for very thin materials including NGR stains

Size Range: .5 to 2.6 (mm)

Tungsten Carbide

Tungsten carbide nozzles and needles are typically used for abrasive materials such as porcelain and ceramics

Sizes: 1.4, 1.8, 2.2, 2.6 (mm)

*Based on internal testing of existing Binks and competitor stainless steel. Tested over 1 million cycles.

From wood to metals to ceramics and more, Binks Trophy Series Spray Equipment can handle your coating needs from start to finish.

Binks Trophy Series Equipment provides all the utility and versatility you need to develop your production plan and execute it with complete confidence. Each gun can be configured with the appropriate

needle and nozzle to accommodate the coating, size of part and type of surface to be finished.

METAL

Trophy Series Spray Guns are your go to guns regardless of what kind of metal parts you're painting. You'll get high quality coating performance out of...

- Urethanes
- Latex
- Two-component materials
- Epoxies

WOOD

Wood surfaces can be expertly finished with Trophy compatible guns designed specifically to handle...

- Toners
- Stains
- NGR Stains
- Topcoats

TRANSPORTATION

Class A finishes for cars, trailers, trucks, busses, airplanes and helicopters and more are delivered with Trophy Series Spray Guns. You'll get the atomization for optimum spraying...

- Primers
- Base Coats
- Clear Coats
- Aerospace specific coatings

SPECIAL COATINGS

Trophy Series Spray Guns and accompanying air caps are fully capable of handling a broad array of coatings and adhesives...

- Waterborne lacquers, UV materials and paints
- Adhesives for furniture, packaging and automotive applications
- High Wear enamels, ceramics, metallics, high solids

ANATOMY OF A CHAMPION

The Binks Trophy Series Line of Spray Guns Offer Unparalleled Robustness For Industrial Coating and Finishing Requirements.

Why We Took Ergonomics So Seriously

Binks Trophy Series Spray Guns feel different by design. They're lighter and are easier to handle over longer periods of time. That means operators can spray for longer periods with less fatigue and injury. This can make a big difference to productivity and your bottom line. That's why we take ergonomics so seriously.

BINKS TROPHY SERIES GUNS ARE:

- 1

LIGHT WEIGHT – one of the lightest spray guns in the industry.
- 2

DESIGNED TO THE HAND – our gun designers tested a variety of hands and grips to come up with the ideal design for the Trophy. The form is ultimately about function and reduced stress.
- 3

TRIGGER PULL – the easy trigger pull action is created by the unique, built-in stabilization features.
- 4

NO KICK AIR VALVE – delivers the smoothest pull on the market. Virtually eliminates any recoil from triggering.
- 5

KNOBS AND AIR CAP RINGS – all the hand adjustments have been designed and manufactured to make it nearly effortless to dial in on your settings or remove parts for maintenance or substitution.

COATING TYPES

- THIN (5-25 Centipoise, 15-19 sec. Zahn 2 Cup)** - Wash primers, dyes, stains, solvents, water, inks, sealers, lacquers, lubricants, zinc chromates, acrylics
- MEDIUM (20-70 Centipoise, 20-30 sec. Zahn 2 Cup)** - Synthetic enamels, varnishes, shellacs, fillers, primers, epoxies, urethanes, lubricants, wax emulsions, enamels
- HEAVY (70-160 Centipoise, 31-66 sec Zahn 2 Cup)**
- ADHESIVES** - Water-based vinyl, glues, solvent-based neoprenes, contact cements
- CERAMICS** - Abrasive materials, glazes, engoves, porcelain enamel

ATOMIZATION TECHNOLOGIES

- **HVLP**

Air Pressure is less than 10 psi at the air cap. Meets USA standards and regulatory requirements
- **LVMP**

Provides equal to or greater transfer efficiency at higher air pressures than HVLP
- **CONV**

Can spray at any air pressure. Good for viscous materials
